# G8 series

DSESCADA
G8 Series Multi-Set Remote Monitoring & Commissioning Software

Part Number: 037-060

DSE SCADA Software

DSE SCADA Multi-Set Commissioning Screen

Description

DSE SCADA is secure software that provides advanced multi-set monitoring & commissioning functionality for G8 Series controllers. The stand-alone software is downloaded from the DSE website and installed onto a Windows based laptop/desktop machine. The software can be configured to connect with individual / multiple generators on the same site. Users are able to gain full system overviews from any remote location with an Internet connection.

The software provides multi-set commissioning functionality, which is unlocked by purchasing a multi-set commissioning license. Licenses are unique to each computer they are installed on. Multi-set commissioning allows users to configure generators independently or apply single settings to multiple generators at the same time.

Key Features

- Server / client application
- Multi-set commissioning (DSE SCADA license required)
- Fully configurable instruments / screens
- Secure software platform
- Windows based software
- Ethernet communications
- View monitored & measured values on a single-screen
- Simple SCADA diagram setup via drag & drop icons
- Run software anywhere with an Internet connection
- Multiple password protection levels (read only / read & write / full admin)
- Monitor & control single / multiple sets
- LAN / WAN compatible
- Reduce on-site monitoring costs
- Start generators independently or together
Key Applications

Hospitals

Industrial

Data Centers

Rental

Telecoms

Hybrid
